# WEST AFRICAN INSTITUTE FOR FINANCIAL AND ECONOMIC MANAGEMENT STATEMENT OF BOARD OF GOVERNORS' RESPONSIBILITIES IN RELATION TO THE PREPARATION OF FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

The Board of Governors of West African Institute for Financial and Economic Management ("the Institute") are responsible for the preparation of the financial statements that give a true and fair view of the financial position of the Institute as at 31 December 2019, its financial performance, changes in equity and cash flows for the year ended, in compliance with the International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board (IASB).

In preparing the financial statements, the Board of Governors are responsible for:

- Properly selecting and applying accounting policies
- Presenting information, including accounting policies, in a manner that provides relevant, reliable, comparable and understandable information
- Providing additional disclosures when compliance with the specific requirements in IFRS are insufficient to enable
  users to understand the impact of particular transactions, other events and conditions on the Institute's financial
  position and financial performance, and
- Making an assessment of the Institute's ability to continue as a going concern

The Board of Governors are responsible for:

- Designing, implementing and maintaining an effective and sound system of internal controls throughout the Institute
- Maintaining adequate accounting records that are sufficient to show and explain the Institute's transactions and disclose with reasonable accuracy at any time the financial position of the Institute
- Maintaining statutory accounting records in compliance with IFRS
- Taking steps that are reasonably available to them to safeguard the assets of the Institute; and
- Preventing and detecting fraud and other irregularities

#### Going Concern

The Board of Governors have made an assessment of the Institute's ability to continue as a going concern and have no reason to believe the Institute will not remain as a going concern in the year ahead.

The financial statements of the Institute for the year ended 31 December 2019 were approved by the Board of Governors on 10 September 2020.

On behalf of the Board of Governors of the Institute

Godwin Emefiele

Chairman of the Board of Governors

Baba Y. Musa

23-04-2020

Director General

Ernst & Young 10th Floor UBA House 57, Marina P. O. Box 2442, Marina Lagos.

#### INDEPENDENT AUDITOR'S REPORT

### TO THE BOARD OF GOVERNORS OF THE WEST AFRICAN INSTITUTE FOR FINANCIAL AND ECONOMIC MANAGEMENT

#### Report on the Audit of the Financial Statements

We have audited the financial statements of West African Institute for Financial and Economic Management ("the Institute") which comprise the statement of financial position as at 31 December 2019, and the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Institute as at 31 December 2019, and its financial performance and cash flows for the year then ended in accordance with the International Financial Reporting Standards as issued by the International Accounting Standards Board (IASB).

#### **Basis for Opinion**

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Institute in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) and other independence requirements applicable to performing audit of West African Institute for Financial and Economic Management. We have fulfilled our other ethical responsibilities in accordance with the IESBA Code, and in accordance with other ethical requirements applicable to performing the audit of West African Institute for Financial and Economic Management.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Other Information

The Board of Governors are responsible for the other information. The other information comprises the Statement of Board of Governors' Responsibilities in Relation to the Preparation of the Financial Statements, Other Financial Disclosures, the Statement of Value Added and the Five-year Financial Summary. The other information does not include the financial statements and our Auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### INDEPENDENT AUDITOR'S REPORT

### TO THE BOARD OF GOVERNORS OF WEST AFRICAN INSTITUTE FOR FINANCIAL AND ECONOMIC MANAGEMENT - Continued

#### Responsibilities of the Board of Governors for the financial statements

The Board of Governors are responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as the Board of Governors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Governors are responsible for assessing the Institute's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Governors either intend to liquidate the Institute or to cease operations, or have no realistic alternative but to do so.

### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
  are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
  effectiveness of the Institute's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Governors.

#### INDEPENDENT AUDITOR'S REPORT

### TO THE BOARD OF GOVERNORS OF WEST AFRICAN INSTITUTE FOR FINANCIAL AND ECONOMIC MANAGEMENT - Continued

#### Auditor's Responsibilities for the Audit of the Financial Statements - Continued

- Conclude on the appropriateness of the Board of Governors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Institute's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Institute to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Board of Governors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The principal activities of the Institute continue to be strengthening capacity building for macro-economic management in the West African sub-region by offering short-term customized courses to professional staff of Central banks, Ministries of finance and economic planning and other agencies involved in the formulation and implementation of macro-economic policies in the West African sub-region.

### 1.2 Approval of financial statements

The financial statements were approved by the Board of Governors and authorised for issue at its meeting held on 10 September 2020.

# 1.3 Statement of compliance with International Financial Reporting Standards

The financial statements of the Institute has been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and for such internal control as the Directors determine is necessary to enable the preparation of the financial statements .1.4 Basis of measurement

The financial statements have been prepared on the historical cost basis. Historical cost is generally based on the fair value of the considerations given in exchange for the assets. 1.5 Functional and presentation currency

Items included in the financial statements of the Institue are measured using the currency that best reflects the economic substance of the underlying events and circumstances relevant to that entity (the functional currency). These financial statements are presented in US Dollars (=\$=), which is the entity's functional 2 Significant accounting policies

The following are the significant accounting policies applied by the Institute in preparing its financial statements: a) Income recognition

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Institute and the income can be reliably measured. Income is measured at the fair value of the consideration received or receivable. The following specific recognition criteria must also be met before revenue is recognized. Subscription

This relates to contributions from member Central Banks of the Institute in accordance with the agreed distribution policy of 35%, 25% for the Central Banks of Nigeria and Ghana respectively and 13.33% for each of Liberia, The Gambia and Sierra Leone against the approved budget for the year. Contributions are made directly to the Institute's bank account housed with the Central Bank of Nigeria. The income is recognized on

- 2 Significant accounting policies Continued
- a) Income recognition continued

#### Grants

These represent grants received from donor organizations towards specific training programs.

Grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

When the Institute receives grants of non-monetary assets, the asset and the grant are recorded at nominal amounts and released to profit or loss over the expected useful life in a pattern of consumption of the benefit of the underlying asset by equal annual instalments.

The spending of these grants is usually monitored by the donors.

This represents income from consultancy, course executions and business development programs. These are recognized on an accrual basis.

#### b) Expenses

This comprised of personnel expenses, training expenses and other operating expenses. These are recognized on an accrual basis, as services are received.

#### c) Property and equipment

#### Recognition and measurement

Property and equipment are stated at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and accumulated impairment losses. Replacement or major inspection costs are capitalized when incurred and if it is probable that future economic benefits associated with the item will flow to the Institute and the cost of the item can be measured reliably.

#### Subsequent costs

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with the item will flow to the Institute and its cost can be measured reliably. The costs of the day-to-day repairs and maintenance of property and equipment are recognised in profit or loss as incurred.

Depreciation is recognised in profit or loss on a straight-line basis to write down the cost of items of property and equipment, to their residual values over the estimated useful lives. Depreciation begins when an asset is available for use and ceases at the earlier of the date that the asset is derecognized or classified as held for sale in accordance with IFRS 5. A non-current asset or disposal group is not depreciated while it is classified as held for sale.

The depreciation rates for the current period of significant items of property and equipment are as follows:

Motor vehicle Motor vehicle Office furniture Office equipment Household furniture	Years 3 - Up till 31 August 2019 5 - From 1 September 2019 4 4 4 5
Household equipment	5
Office furniture Office equipment Household furniture	4 4 4

2 Significant accounting policies - Continued

#### c) Property and equipment - continued

#### Derecognition

An item of property and equipment is derecognized upon disposal or when no further future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the year the asset is derecognized.

#### d) Intangible assets

#### Computer Software

Intangible assets are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses.

The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortized over the useful economic lives and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at each financial year end.

Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognized in the statement of comprehensive income in the expense category consistent with the function of the intangible asset.

Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cash generating unit level. Such intangibles are not amortized. The useful life of an intangible asset with an indefinite life is reviewed annually to determine whether indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in profit or loss when the asset is derecognized.

The Institute's intangibles assets are Computer software. These represent the cost of procuring computers software. Computer software is amortized on a straight line rate of 50%. Cost associated with maintaining the software programs are recognized as an expense when incurred.

#### e) Inventories

Inventories are valued at the lower of cost and net realizable value. Cost includes purchase cost and other cost incurred in bringing the stocks to present location and condition. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

#### 2 Significant accounting policies - Continued

#### f) Financial assets and liabilities

All financial assets and liabilities- which include derivative financial instruments- have to be recognized in the statement of financial position and measured in accordance with their assigned category.

#### - Initial recognition and measurement

Financial assets are initially measured at fair value plus transactions costs that are directly attributable to the acquisition or issue of the financial Instruments.

#### - Subsequent measurement

Subsequent to initial measurement, financial instruments are measured either at fair value or amortised cost depending on their classification.

#### - Classification and related measurement

Subsequent to initial measurement, financial instruments are measured either at amortised cost or fair value depending on their classification category.

#### i) Financial assets

Subsequent to initial recognition, all financial assets within the Institute are measured at

#### Amortized cost

Fair value through comprehensive income (FVOCI); or

Fair value through profit or loss (FVTPL)

#### Debt instruments at amortised cost or at FVTOCI

The Institute assesses the classification and measurement of a financial asset based on the contractual cash flow characteristics of the asset and the Institute's business model for managing the asset.

For an asset to be classified and measured at amortised cost or at FVTOCI, its contractual terms should give rise to cash flows that are solely payments of principal and interest on the principal outstanding (SPPI).

For the purpose of SPPI test, principal is the fair value of the financial asset at initial recognition. That principal amount may change over the life of the financial asset (e.g. if there are repayments of principal). Interest consists of consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin. The SPPI assessment is made in the currency in which the financial asset is denominated.

Contractual cash flows that are SPPI are consistent with a basic lending arrangement. Contractual terms that introduce exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement, such as exposure to changes in equity prices or commodity prices, do not give rise to contractual cash flows that are SPPI. An originated or an acquired financial asset can be a basic lending arrangement irrespective of whether it is a loan in its legal form.

An assessment of business models for managing financial assets is fundamental to the classification of a financial asset. The Institute determines the business models at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. The Institute's business model does not depend on management's intentions for an individual instrument. Therefore the business model assessment is performed at a higher level of aggregration rather than on an instrument- by- instrument basis.

- 2 Significant accounting policies Continued
- f) Financial assets and liabilities continued

#### Debt instruments at amortised cost or at FVTOCI - continued

The Institute has more than one business model for managing its financial instruments which reflects how the Institute manages its financial assets in order to generate cash flows. The Institutes's business models determine whether cash flows will result from collecting contractual cash flows, selling financial assets or both.

The Institute considers all relevant information available when making the business model assessment. However, this assessment is not performed on the basis of scenarios that the Institutes does not reasonably expect to occur, such as so-called 'worst case' or' stress case' scenarios. The Institute takes into account all relevant evidence available such as:

- how the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way in which those risks are managed; and
- how managers of the business are compensated (e.g. whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).

At initial recognition of a financial asset, the Institute determines whether newly recognised financial assets are part of an existing business model or whether they reflect the commencement of a new business model. The Institute reassess its business models at each reporting period to determine whether the business models have changed since the preceding period. For the current and prior reporting period, the Institute has not identified a change in its business models.

When a debt instrument measure at FVTOCI is derecognised, the cumulative gain/loss previously recognised in OCI is reclassified from equity to profit or loss. In contrast, for an equity investment designated as measured at FVTOCI, the cumulative gain/loss previously recognised in OCI is not subsequently reclassified to profit or loss but transferred within equity.

Debt instruments that ae subsequently measured at amortised cost or at FVTOCI are subject to impairment.

As at 31 December 2019, the Institute did not hold any debt instrument measured at fair value through other comprehensive income (FVOCI).

#### <u>Debt instruments Fair value through profit or loss</u>

Financial assets at FVTPL are:

Assets with contractual cashflows that are SPPI; or/and assets that are held in a business model other than held to collect contractual cash flows or held to collect and sell; or assets designated at FVTPL using the fair value option.

These assets are measured at fair value, with any gains/losses arising on remeasurement recognised on profit or loss.

#### Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

2 Significant accounting policies - Continued

#### Impairment

The Institute recognises loss allowances for expected credit losses (ECLs) on the following financial instruments at amortised cost:

Debt investment securities;

Other receivables:

17

ECLs are required to be measured though a loss allowance at an amount equal to:

-12-month ECL, i.e. lifetime ECL that result from those default events on the financial instruments that are possible within 12 months after the reporting date, (referred to as Stage1); or full lifetime ECL, i.e. lifetime ECL that result from all possible default events over the life of the financial instrument, (referred to as Stage 2 and Stage 3).

-A loss allowance for full lifetime ECL is required for a financial instrument if the credit risk on that financial instrument has increased significantly since initial recognition. For all other financial instruments, ECLs are measured at an amount equal significantly or insignificantly to the 12-month ECL.

-ECLs are a probability-weighted estimate of the present value of credit losses. These are measured as the present value of the difference between the cash flows due to the Institute under the contract and the cash flows that the Institute expects to receive arising from the weighting of multiple future economic scenarios, discounted at the asset's EIR.

-The institute measures ECL on an individual basis, or on a collective basis for debt instruments that share similar economic risk characteristics. The measurement of the loss allowance is based on the present value of the asset's expected cash flows using the asset's original EIR, regardless of whether it is measure on an individual basis or a collective basis.

#### Significant increase in credit risk

The Institute monitors all financial assets that are subject to the impairment requirements to assess whether there has been a significant increase in credit risk since initial recognition. If there has been a significant increase in credit risk, the Institute will measure the loss allowance based on lifetime rather than 12 month ECL. The Institute's accounting policy is not to use the practical expedient that financial assets with 'low' credit risk at the reporting date are deemed not to have had a significant increase in credit risk. As a result, the Institute monitors all financial assets that are subject to impairment for significant increase in credit risk.

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Institute compares the risks of a default occurring on the financial statements at the reporting date based on the remaining maturity of the instrument with the risk of a default occurring that was anticipated for the remaining maturity at the current reporting date when the financial instrument was first recognised. In making this assessment, the Institute considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort, based on the Institute's historical experience and expert credit assessment including forward-looking.

Multiple economic scenarios form the basis of determining the probability of defauit at initial recognition and at subsequent reporting dates. Different economic scenarios will lead to a different probability of default. It is the weighing of these different scenarios that forms that basis of a weighted average probability of default that is used to determine whether credit risk has significantly increased.

As a back-stop, when an asset becomes 30 days past due, the Institute considers that a significant increase in credit risk has occurred and the asset is in stage 2 of the impairment model, i.e. the loss allowance is measured as the lifetime ECL.

- 2 Significant accounting policies Continued
- f) Financial assets and liabilities continued

TI.

#### Modification and derecognition of financial assets

A modification of a financial asset occurs when the contractual terms governing the cash flows of a financial asset are renegotiated or otherwise modified between initial recognition and maturity of the financial asset. A modification affects the amount and/or timing of the contractual cash flows either immediately or at a future date. In addition, the introduction or adjustment of existing covenants of an existing loan would constitute a modification even if these new or adjusted covenants do not yet affect the cash flows immediately but may affect the cash flows depending on whether the convenant is or is not met (e.g. a change to the increase in the interest rate that arises when the covenants are breached).

When a financial asset is modified, the Institute assesses whether this modification results in derecognition. In accordance with the Institute's policy, a modification results in derecognition when it gives rise to substantially different terms. To determine if the modified terms are substantially different from the original contractual terms, the Institute considers the following:

Qualitative factors, such as contractual cash flows after modification are no longer SPPI, change in currency or change of counterparty, the extent of change in interest rates, maturity, covenants. If these do not clearly indicate a substantial modification, then;

A quantitative assessment is to be performed to compare the present values to the remaining contractual cash flows under the original terms with the contractual cash flows under the revised terms, both amounts discounted at the original effective interest.

In the case where the financial asset is derecognised, the loss allowance for ECL is remeasured at the date of derecognition to determine the net carrying amount of the asset at that date. The difference between this revised carrying amount and the fair value of the new financial asset with the new terms will lead to a gain or loss on derecognition. The new financial asset will have a loss allowance measured based on 12-month ECL except in the rare occassion where the new loan is considered to be originated credit impaired. This applies only in the case when the fair value of the new loan is recognised at a significant discount to its revised paramount because there remains a high risk of default which has not been reduced by the modification. The Institute monitors credit risk of modified financial assets by evaluating qualitative and quantitative information, such as if the borrower is in past due status under the new terms.

When the contractual terms of a financial asset are modified and the modification does not result in derecognition, the Institute determines if the financial asset's credit risk has increased significantly since initial recognition by comparing:

-the remaining lifetime PD estimate based on data at initial recognition and the original contractual terms; with

- the remaining lifetime of PD at the reporting date based on the modified terms.

- 2 Significant accounting policies Continued
- i) Financial assets and liabilities continued

#### Modification and derecognition of financial assets - continued

The Institute derecognizes a financial asset only when contractual rights to the asset's cashflows expire (including expiry arising from a modification with substantially different terms), or when the financial asset and substantially all the risks and rewards of ownership of the asset are transferred to another entity. If the Institute neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Institute neither recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Institute retains substantially all the risks and rewards of ownership of a transferred financial asset, the Institute continues to recognize the financial asset and recognizes a collateralized borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain/loss that had been recognized in OCI and accumulated in equity is recognized in profit or loss, with exception of equity investment designated as measured at FVTOCI, where the cumulative gain/loss previously recognized in OCI is not subsequently reclassified to profit or loss.

On derecognition of a financial asset other than its entirety (e.g. when the Institute retains an option to repurchase part of a transferred asset), the Institute allocates the previous carrying amount of the financial asset between the part it continues to recognize under continuing involvement and the part it no longer recognizes on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognized and the sum of the consideration received for the part no longer recognized and any cumulative gain/loss allocated to it that had been recognized in OCI is allocated between the part that continues to be recognized and the part that is no longer recognized on the basis of the relative fair values of those parts. This does not apply for equity investments designated as measured at FVTOCI as the cumulative gain/loss previously recognized in OCI is not subsequently reclassified to profit or loss.

#### Write-off

Debt securities and other receivables are written off when the Institute has no reasonable expectations of the financial asset (either in its entirety or portion of it). This is the case when the Institute determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. A write-off constitutes a derecognition event. The Institute may apply enforcement activities to the financial assets written off. Recoveries resulting from the Institute's enforcement activities will result in impairment gains.

#### Presentation of allowance for ECL in the statement of financial position

Loss allowances for ECL are presented in the statement of financial position as follows:

- for financial assets measured at amortized cost: as a deduction from the gross carrying amount of the assets:
- for debt instruments measured at FVTOCI: no loss allowance is recognized in the statement of financial position as the carrying amount is at fair value. However, the loss allowance is included as part of the revaluation amount in the investments revaluation reserve:

- 2 Significant accounting policies Continued
- f) Financial assets and liabilities continued
- ii) Financial liabilities and equity

#### Financial liabilities

TI

T.

A financial liability is a contractual obligation to deliver cash or another financial asset or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Institute's own equity instruments and is a non-derivative contract for which the Institute is or may be obliged to deliver a variable number of its own equity instruments, or a derivative contract over own equity that will or may be settled other than by the exchange of a fixed amount of cash (or another financial asset) for a fixed number of the Institute's own equity instruments.

#### Financial liabilities at FVTPL

Financial liabilities are classified as at FVTPL when the financial liability is (i) held for trading, or (ii) it is designated as at FVTPL

A financial liability is classified as held for trading if:

It has been incurred principally for the purpose of repurchasing it in the near term; or on initial recognition it is part of a portfolio of identified financial instruments that the Institute manages together and has a recent actual pattern of short term profit taking or it is a derivative that is not designated and effective as a hedging instrument.

A financial liability other than a financial liability held for trading or contingent consideration that may be paid by an acquirer as part of a business combination may be designated as at FVTPL upon initial recognition if: such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or the financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis; in accordance with the Institute's documented risk management or investment strategy, and information about the accompanying is provided internally on that basis; or it forms part of a contract containing one or more embedded derivatives and IFRS 9 permits the entire hybrid (combined) contract to be designated as at FVTPL.

Financial liabilities at FVTPL are stated at their fair value, with any gains/losses arising on remeasurement recognized in profit or loss to the extent that they are not part of a designated hedging relationship. The net gain/loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'net income from other financial instruments at FVTPL' line in the profit or loss account.

The Institute does not have any financial liabilities at fair value through profit or loss at the reporting date.

#### Other financial liabilities

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs. Other financial liabilities are subsequently measured at amortised cost using the Effective Interest Rate method (EIR).

The effective interest method is a method of calculating the amortized cost of a financial liability and allocating interest expense over the relevant period. The EIR is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability or, where appropriate, a shorter period to the net carrying amount on initial recognition.

2 Significant accounting policies - Continued

11

3

- f) Financial assets and liabilities continued
- ii) Financial liabilities and equity continued

#### Derecognition of financial liabilities

The Institute derecognizes financial liabilities when, and only when, the Institute's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit and loss.

When the institute exchanges with the existing lender one debt instrument into another one with substantially different terms, such exchange is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, the Institute accounts for substantial modification of terms of an existing liability or part of it as an extinguishment of the original financial liability and the recognition of a new liability. It is assumed that the terms are substantially different if the discounted present value of the cash flows under the new terms including any fees paid net of any fees received and discounted using the original effective rate is at least 10 percent different from the discounted present value of the remaining cash flows of the original financial liability.

#### **Equity instruments**

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all its liabilities. Equity instruments issued by the Institute are recognized at the proceeds received, net of direct issue costs.

Repurchase of the Institute's own equity instruments is recognized and deducted directly in equity. No gain/loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Institute's own equity instruments.

#### g) Employee benefits

#### Staff provident fund (SPF)

The Institute operates a defined contribution pension scheme. The scheme is managed in-house.

The SPF is a contributory fund where all employees of the Institute make a contribution of 10% of their basic salary and the Institute contributes 20% of the employee's basic salary. Management administers this Fund in accordance with the approved Regulations of the Staff Provident Fund. Employees can make withdrawals of up to 60% of their total contributions from the fund as long as certain conditions are met. This withdrawal can be made after the employee has worked for the Institute for more than 3 years.

Employees are entitled to the full balance of their total contribution, less any withdrawals, upon termination or resignation or retirement from employment with the Institute. There is no requirement for interest to be paid on these contributions except the money is invested. The fund is currently held in a US dollar domicillary account with the Central Bank of Nigeria where it generates little or no interest.

#### h) Foreign currency translations

Transactions denominated in currencies other than the United States Dollar are translated at the rate of exchange ruling at the reporting date.

Monetary assets and liabilities in foreign currencies are converted to USD at the rate of exchange ruling at the reporting date.

Gains and losses arising there from are included in the income and expenditure account.

2 Significant accounting polcies - Continued

#### i) Taxation

According to Article vii (1) of The Headquarters agreement between WAIFEM and the Government of the Federal Republic of Nigeria, West African Institute for Financial and Economic Management (WAIFEM) is exempted from taxes and duties of any kind whether State, Provincial, Local and any other authority and whether such taxes and duties are now in existence or are to be imposed or issued in the future.

#### j) Current versus non-current classification

The Institute presents assets and liabilities in the statement of financial position based on current/noncurrent classification. An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current. A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the

The Institute classifies all other liabilities as non-current.

#### 3 Significant accounting judgments, estimates and assumptions

The preparation of the Institute's financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability affected in future periods

#### Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Institute based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising beyond the control of the Institute. Such changes are reflected in the assumptions when they occur.

#### Useful lives and carrying value of property and equipment, and intangibles

The estimation of the useful lives of assets is based on management's judgment. The useful lives are determined based on the expected period over which the asset will be used and benefits received by the Institute from the use of the asset. Residual values are determined by obtaining observable market prices for the asset with the same age that the asset would be at the end of its useful life. Any material adjustment to the estimated useful lives of items of property and equipment will have an impact on the carrying value of these items (See note 11).

3 Significant accounting judgments, estimates and assumptions - continued

Determination of impairment of property and equipment, and intangible assets

Management is required to make judgments concerning the cause, timing and amount of impairment. In the identification of impairment indicators, management considers the impact of changes in current competitive conditions, cost of capital, availability of funding, technological obsolescence, discontinuance of Services and other circumstances that could indicate that impairment exists. The Institute applies the impairment assessment to its separate cash generating units. This requires management to make significant judgments and estimates concerning the existence of impairment indicators, separate cash generating units, remaining useful lives of assets, projected cash flows and net realizable values. Management's judgment is also required when assessing whether a previously recognized impairment loss should be reversed. There was no indicator of impairment of property and equipment throughout the year.

#### Determining fair values

The determination of fair value for financial assets and liabilities for which there is no observable market price requires the use of valuation techniques. For financial instruments that trade infrequently and have little price transparency, fair value is less objective, and requires varying degrees of judgment depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument. The Institute uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. Refer to Note 22.

#### 3.1 New and amended standards and interpretations

There are several amendments and interpretations that apply for the first time in 2019, but do not have an impact on the financial statements of the Institute. These include the following:

(a) IFRS 16 - Leases

- (b) IFRIC Interpretation 23 Uncertainty over Income Tax Treatment
- (c) Amendments to IFRS 9: Prepayment Features with Negative Compensation
- (d) Amendments to IAS 19: Plan Amendment, Curtailment or Settlement
- (e) Amendments to IAS 28: Long-term interests in associates and joint ventures
- (f) Annual Improvements 2015-2017 Cycle (issued in December 2017)
  - ▶ IFRS 11 Joint arrangements
  - ► IAS 12 Income taxes
  - ► IAS 23 Borrowing costs
  - ► IFRS 3 Business combinations

#### 3.2 Standards issued but not yet effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Institute's financial statements are disclosed below. The Institute intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

#### (a) The Conceptual Framework for Financial Reporting

The IASB has issued a revised Conceptual Framework which will be used in standard-setting decisions with immediate effect. Key changes include:

- ► increasing the prominence of stewardship in the objective of financial reporting
- ► reinstating prudence as a component of neutrality
- be defining a reporting entity, which may be a legal entity, or a portion of an entity
- revising the definitions of an asset and a liability
- removing the probability threshold for recognition and adding guidance on derecognition
- ► adding guidance on different measurement basis, and
- \* stating that profit or loss is the primary performance indicator and that, in principle, income and expenses in other comprehensive income should be recycled where this enhances the relevance or faithful representation of the financial statements.

No changes will be made to any of the current accounting standards. However, entities that rely on the Framework in determining their accounting policies for transactions, events or conditions that are not otherwise dealt with under the accounting standards will need to apply the revised Framework from 1 January 2020. These entities will need to consider whether their accounting policies are still appropriate under the revised Framework.

#### (b) Amendments to IFRS 9, IAS 39 and IFRS 7 - Interest Rate Benchmark Reform

In September 2019, the IASB issued amendments to IFRS 9, IAS 39 and IFRS 7, which concludes phase one of its work to respond to the effects of Interbank Offered Rates (IBOR) reform on financial reporting. The amendments provide temporary reliefs which enable hedge accounting to continue during the period of uncertainty before the replacement of an existing interest rate benchmark with an alternative nearly risk-free interest rate (an RFR).

#### The amendments to IFRS 9

The amendments include a number of reliefs, which apply to all hedging relationships that are directly affected by the interest rate benchmark reform. A hedging relationship is affected if the reform gives rise to uncertainties about the timing and/or amount of benchmark-based cash flows of the hedged item or the hedging instrument.

Application of the reliefs is mandatory. The first three reliefs provide for:

- ▸ The assessment of whether a forecast transaction (or component thereof) is highly probable
- $m{\cdot}$  Assessing when to reclassify the amount in the cash flow hedge reserve to profit and loss
- The assessment of the economic relationship between the hedged item and the hedging instrument For each of these reliefs, it is assumed that the benchmark on which the hedged cash flows are based (whether or not contractually specified) and/or, for relief three, the benchmark on which the cash flows of the hedging instrument are based, are not altered as a result of IBOR reform. The fourth relief provides that, for a benchmark component of interest rate risk that is affected by IBOR reform, the requirement that the risk component is separately identifiable need be met only at the inception of the hedging relationship. Where hedging instruments and hedged items may be added to or removed from an open portfolio in a continuous hedging strategy, the separately identifiable requirement need only be met when hedged items are initially designated within the hedging relationship.

#### 3.2 Standards issued but not yet effective

### (b) Amendments to IFRS 9, IAS 39 and IFRS 7 - Interest Rate Benchmark Reform - continued

To the extent that a hedging instrument is altered so that its cash flows are based on a risk free rates (RFR), but the hedged item is still based on IBOR (or vice versa), there is no relief from measuring and recording any ineffectiveness that arises due to differences in their changes in fair value.

The amendments also introduce specific disclosure requirements for hedging relationships to which the reliefs are applied.

This amendment will not have significant impact on the Institute's financial statements when they become effective.

#### (c) The amendments to IAS 39

The corresponding amendments are consistent with those for IFRS 9, but with the following differences:

- For the prospective assessment of hedge effectiveness, it is assumed that the benchmark on which the hedged cash flows are based (whether or not it is contractually specified) and/or the benchmark on which the cash flows of the hedging instrument are based, are not altered as a result of IBOR reform.
- For the retrospective assessment of hedge effectiveness, to allow the hedge to pass the assessment even if the actual results of the hedge are temporarily outside the 80%-125% range, during the period of uncertainty arising from IBOR reform.
- For a hedge of a benchmark portion (rather than a risk component under IFRS 9) of interest rate risk that is affected by IBOR reform, the requirement that the portion is separately identifiable need be met only at the inception of the hedge.

This amendment will not have significant impact on the Institute's financial statements when they become effective.

Other amendments to standards, which currently do not apply to the Institute are listed below:

- -IFRS 17 Insurance Contracts
- -Amendments to IFRS 10 and IAS 28: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture
- -Amendments to IFRS 3: Definition of a Business
- -Amendments to IAS 1 and IAS 8: Definition of Material
- -Amendments to IAS 1: Classification of Liabilities as Current or Non-Current

13.1 Sundry debtors  Receivable from International Monetary Fund (IMF)  Receivable from World Bank  Receivable from Federal Ministry of National Planning & Budgeting, Abuja	40,470	41,191 8,270 12,345 61,806
14 Cash held for Staff Provident Fund (SPF)	2019 US\$	2018 US\$
Cash held for Staff Provident Fund (SPF)	1,679,541	1,468,087

14.1 60% of the Staff Provident Fund are payable to staff on demand if certain conditions are met. The full balance is payable to staff upon termination or resignation or retirement from employment with the Institute.

5 Cash and cash equivalents	2019 US\$	2018 US\$
Cash in banks Endowment fund at bank Cash on hand	1,753,956 79,265	1,088,007*** 79,265
· ·	1,591 1,834,812	18,211 1,185,483

Cash & cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Endowment fund is credited with surpluses from the Institute's overall operations.

1

16 Trade and other payables	2019	2018
	US\$	US\$
Accruals (note 16.1)	36,175	93,295
	36,175	93,295

16.1 Accruals in respect of various expenses (e.g. audit fees, printing, medical bills), which have been incurred during the year but remained unpaid as at year end. The Institute normally settles such expenses within one to three months from the day of receipt of service to which they relate.

17 Staff Provident Fund (SPF)			2019 US\$	2018 US\$
Balance at 1 January Contributions by Staff (10% of total salary) Contributions by the Institute (20% of total salary) Adjustment for interest:	Note 17.1 Note 17.1	¥	1,468,098 128,672 257,328	1,516,929 131,837 263,617
Payment to withdrawn staff Balance at 31 December	Note 17.2	-	1,854,098 (174,546) 1,679,552	529 1,912,912 (444,814) 1,468,098

The SPF is a contributory fund where all employees and employer of the Institute make a contribution of 10% and 20% respectively of the employee's basic salary.

There is no requirement for interest to be paid on these contributions except the money is invested. The fund is currently held in a US dollar domiciliary account with The Central Bank of Nigeria where it generates little or no interest. Management in consultation with Board made several attempts to invest in risk - free portfolios which are very limited.

#### 21 Financial Risk Management objectives and policies

The nature and carrying values of financial instruments that the Institute deploys in carrying out its activities are included in notes 13 to 17. The Institute's principal financial liabilities comprise trade and other payables. The main purpose of these financial liabilities is to finance operations and to provide guarantees that support its operations. The Institute has trade and other receivables, and cash and bank balance that arise directly from its operations. The major risks that the Institute is exposed to as a result of deploying financial instruments include market risk, credit risk, liquidity risk and Operational risk. The Institute oversees the management of these risks. The Management advises on financial risks and the appropriate financial risk strategy within its policy framework to ensure that risks are kept at a minimum level. The Management provides assurance that the financial risk-taking activities are governed by appropriate policies and procedures and that financial risk are identified, measured and managed to reduce the impact on its operations. The Management reviews and agrees policies for managing each of these risks which are summarised below.

#### (a) Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise three types of risk: interest rate risk, currency risk and other price risk, such as equity price risk. The Institute is not exposed to any significant market risks resulting from its financial instruments.

#### (b) Interest rate risk

The Institute does not have any long term debt obligations. The Institute's trade and other payables are for working capital and as such the Institute has little or no exposure to interest rate risk as at the year end.

#### (c) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Institute's exposure to the risk of changes in foreign exchange rates relates primarily to the Institute's operating activities (when revenue or expense is denominated in a different currency from the Institute's presentation currency).

The table below summarises the Institute's exposure to foreign currency exchange rate risk at 31 December 2019 and 31 December 2018. Included in the table are the Institute's financial instruments at carrying amounts, categorised by currency.

As at 31 December 2019	NAIRA US\$	EURO US\$
Net foreign currency exposures Cash and bank balances	105.106	77.320
As at 31 December 2018 Net foreign currency exposures	( 105,100	77,320
Cash and bank balances	105,786	

#### Foreign currency sensitivity

The Foreign exchange sensitivity analysis of the Institue is presented below.

For each foreign currency net exposure it is reasonable to assume a 5% appreciation/depreciation against the functional currency. If all other variables are held constant, the tables below present the impacts on profit or loss before tax if these currency movements had occurred.

The following table details the sensitivity to a 5% increase and decrease in US Dollar against the Naira and Euro. Management believe that a 5% movement in either direction is reasonably possible at the reporting date. The sensitivity analysis below include outstanding Naira and Euro denominated assets and liabilities. A positive number indicates an increase in profit where US Dollar strengthens by 5% against the Naira and Euro. For a 5% weakening of US Dollar against the Naira and Euro, there would be an equal and opposite impact on profit, and the balance below would be negative.

Foreign exchange sensitivity analysis (31 December 2019) US Dollar strengthens by 5%	NAIRA US\$	EURO US\$
Profit/ (loss)	5,255	3,866
US Dollar weakens by 5% Profit/ (loss)	(5,255)	(3,866)
Foreign exchange sensitivity analysis (31 December 2018)  US Dollar strengthens by 5%		
Profit/ (loss)	5,289	
US Dollar weakens by 5% Profit/ (loss)	(5,289)	

#### 21 Financial Risk Management objectives and policies - continued

#### (d) Price risk

The Institute does not carry any financial instrument that exposes it to significant price risk.

#### (e) Credit risk

Credit risk is the risk of financial loss to the Institute if members or donors fail to meet their contractual obligations, and arises principally from the Institute's receivables from members and donor agencies. The Institute's principal exposure to credit risk is influenced mainly by the individual characteristics of each member and/or donor agency. Management is responsible for analysing each existing and new members based on experience and relevant available information on an ongoing basis. This is to ensure that the subscriptions and/or grants in form of subscription/contribution are made good by the respective members and donors. The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets. The Institute evaluates the concentration of risk with respect to cash and bank balances and trade and other receivable as low. This is because its customers are located in several jurisdictions and operate in largely independent markets and also, it uses the services of several banks.

#### i) Credit Collateral

The Institute generally does not hold collateral over its financial assets and no such collaterals were held as at 31 December 2019 (2018: Nil).

#### ii) Credit exposure

The credit risk analysis below is presented in line with how the Institute manages the risk. The Institute manages its credit risk exposure based on the carrying value of the financial instruments.

#### iii) Industry analysis

	Financial	*	and the same		
	services	Government	Consumer	Others	Total
	US\$	US\$	US\$	US\$	US\$

As at 31 December 2018				
Trade and other receivables	61,806	-		61,806
Total	61,806		-	61,806

#### (f) Liquidity risk

Liquidity risk is the risk that the Institute will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Institute's approach to managing liquidity is to ensure, as far as practicable, that it will always have sufficent liquidity to meet its liabilities as at when due, without incurring unacceptable losses or risking damage to the Institute's reputation.

However, the Institute ensures that it has sufficient cash on demand to meet current and expected operational needs.

#### i) Maturity profiles

The table that follows summarises the maturity profile of the financial assets and financial liabilities of the Institute based on remaining undiscounted contractual obligations, including interest payable and receivable.

#### Maturity analysis (contractual undiscounted cash flow basis)

	Carrying amount US\$	Up to 3months US\$	3-6 months US\$	Total US\$

#### 21 Financial Risk Management objectives and policies - continued

#### (g) Capital management

Capital is the equity attributable to the equity holders of an entity. The primary objective of the Institute's capital management is to ensure that it maintains strong accumulated funds in order to support its operations and to sustain future developments. The Institute is not subject to any internally or externally imposed capital requirements.

#### (h) Operational risk

Operational risk is the risk of loss in both financial and non-financial terms resulting from human error and the failure of internal processes and systems.

Managing operational risk is seen as part of the day-to-day operations and management, which includes explicit consideration of both opportunities and the risks of all business activities. Operational risk management includes Institute-wide policies that describe the standard required of both staff and specific internal control systems designed for implementation in the Institute. Compliance with corporate policies and departmental internal control systems are managed by departmental management and an active internal audit function.

#### 22 Fair value of financial assets and liabilities

Financial instruments that are measured subsequent to initial recognition at fair value, are grouped into Levels 1 to 3 based on the degree to which the fair value is observable.

Level 1: fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: for equity securities not listed on an active market and for which observable market data exist that the Institute can use in order to estimate the fair value;

**Level 3:** fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

There were no assets or liabilities measured at fair value at reporting date (2018: Nil).

#### 22.1 Financial instruments not measured at fair value

Table below shows the carrying value of financial assets not measured at fair value.

	Level 1	Level 2	Level 3
As at 31 December 2019			
Financial assets		-	1,834,812
Cash and bank balances		-	1,679,541
Cash held for Staff Provident Fund (SPF)		-	40,470
Trade and other receivables			3,554,823
Financial liabilities			
Trade and other payables		-	36,175
Staff provident fund		-	1,679,552
			1,715,727
			•
As at 31 December 2018			
Financial assets			1,185,483
Cash and bank balances			1,468,087
Cash held for Staff Provident Fund (SPF)		-	61,806
Trade and other receivables		-	2,715,376
Financial liabilities			
Trade and other payables			93,295
Staff provident fund		-	1,468,098
		-	1,561,393

The Institute considers the carrying value of all financial assets and liabilities to approximate their fair values. There were no transfers between the different levels in 2019 and 2018.

#### 23 Contingent liabilities

There were no pending litigations as at 31 December 2019 (2018: Nil) against the Institute.

#### 24 Capital Commitments

There was no capital expenditure contracted but not provided for in these financial statements as at 31 December 2019 (2018: Nil).

#### 25 Events after the reporting period

The current Coronavirus disease (COVID-19) outbreak is causing significant disruption to the society and this has impacted the Institute, its employees and its customers.

The Institute has performed an assessment of whether the current uncertainty may impact any of the amounts presented at 31 December 2019 and Management has concluded that the amounts recognised in the financial statement do not required further adjustment.

As the depth and length of this crisis is still unknown, the Institute will continue to monitor the situation as new information becomes available and adjustments thereof will be reflected in the appropriate reporting period.

There are no other events after reporting date which could have a material effect on the financial position of the Institute as at 31 December 2019 and income and expenditure and other comprehensive income on that date which have not been adequately adjusted for or disclosed.

WEST AFRICAN INSTITUTE FOR FINANCIAL AND ECONOMIC MANAGEMENT
